The Thermal Sensors comprise a stainless steel sensor connected to a component certified, flameproof, cast aluminium alloy terminal head.

The available types are as follows:

Type OPE, which can have a welded-in sheath of 9 mm diameter or a 6 mm diameter sheath which must be used with the type LOS thermowell for mechanical protection KT19 8DA.

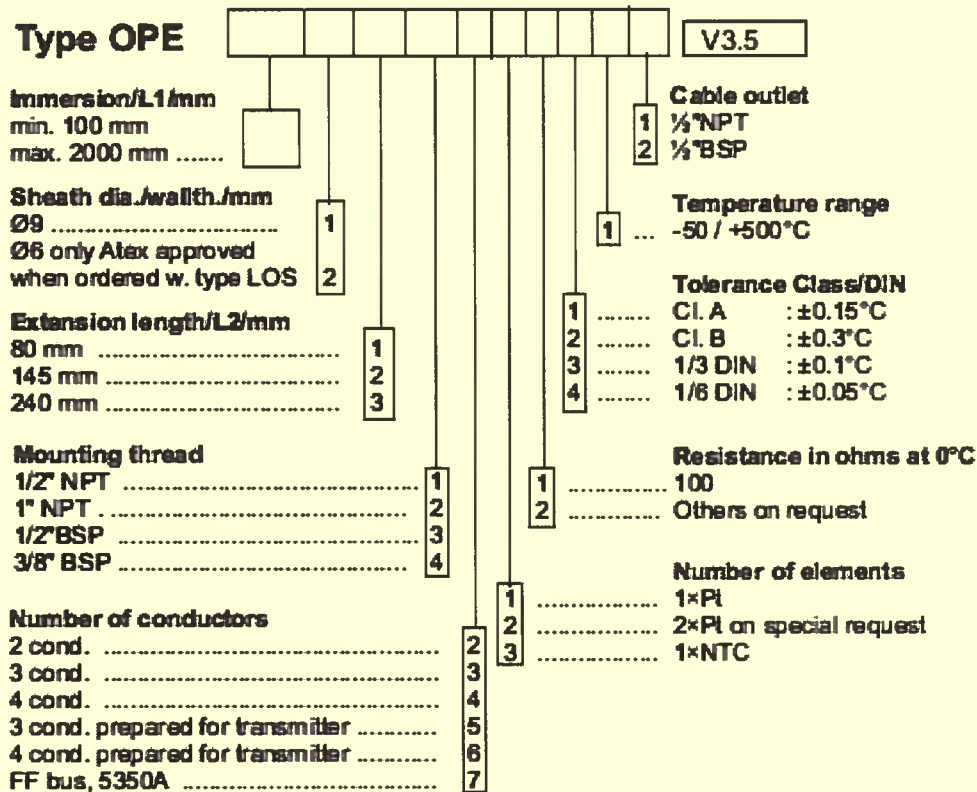

Type OPX, which has a reduced tip size for faster response and is welded to a mounting flange.

All types can have a PT or NTC sensing element, with or without an incorporated transmitter

The terminal head has EPL Gb/Da and the probe tip has EPL Ga/Da
